

5th Thematic Workshop of the FAERE

Rennes,
Department of Economics
24-25 March 2016

The management of natural resources: critical issues Call for papers

The management of natural resources raises critical issues. Their exploitation results in much environmental damage with significant economic costs. Energy and environmental policies can modify trends related to inequality and poverty. The scarcity of natural resources and the weakness of the institutions that manage their exploitation may also be the source of many conflicts. The recent commoditization of energy markets increases price volatility and affects world energy markets.

The themes of the **5th Thematic Workshop of the French Association of Environmental and Resource Economists (FAERE)** will be:

- Climate change and natural resources,
- Conflicts, terrorism and natural resources,
- Poverty, inequality and natural resources,
- Commoditization of energy markets and price volatility.

Around 12 papers will be selected for presentation. Limited accommodation and domestic travel support may be provided.

Interested authors should submit either a draft or a detailed abstract of their paper by:

December, 18th 2015.

E-mail address:

crem-faere@univ-rennes1.fr

Keynote Speaker:

Ujjayant Chakravorty (Tufts University, MA, USA)

Scientific Committee:

- Isabelle Cadoret (CREM, Univ. Rennes 1)
- Laurent Denant-Boèmont (CREM, Univ. Rennes 1)
- Charles Figuières (LAMETA, Univ. Montpellier)
- Alexandre Gohin (SMART LERECO, INRA Rennes)
- Marie-Hélène Hubert (CREM, Univ. Rennes 1)
- François Salanié (TSE, LERNA, INRA Toulouse)
- Véronique Thelen (CREM, Univ. Rennes 1)

Organizing Committee:

Isabelle Cadoret

Marie-Hélène Hubert

Important dates:

Submission deadline : 18/12/2015

Notification of acceptance : 04/01/2016

Registration deadline : 25/01/2016
