

ANNOUNCEMENT AND CALL FOR PAPERS

WORKSHOP ECONOMIC ANALYSIS OF ENVIRONMENTAL FOOD POLICIES

Toulouse, 16-17 November, 2017

AIM.

After fossil fuels, agricultural production and fisheries are the two main industries that impact the environment the most. They are significant contributors in terms of climate change but also in terms of eutrophication, land use, water use and toxicity. The environmental impact of food is in large part determined by household diet and consumption habits. Population and economic growth should lead to an even higher environmental impact on the future if patterns of production and consumption are not changed. The objective of the workshop is to discuss recent theoretical and empirical contributions in economics on the analyses of environmentally-friendly public policies at the consumption, distribution, processing and farm level.

TOPICS OF POSSIBLE INTEREST.

A non-exhaustive list of topics to examine the economic challenges for a more sustainable society includes: sustainable food consumption, quality choices in food production and processing, contractual arrangements in food supply chain, environmental public policies, animal-vegetal substitution

LOCATION.

Toulouse School of Economics, Manufacture des Tabacs, 21 Allée de Brienne, 31042 Toulouse cedex, France.

SUBMISSION.

Papers should be sent by 18 June, 2017 to workshop.pav@lists.tse-fr.eu. A decision will be made by 7 July, 2017.

COSTS and ACCOMODATIONS.

The registration fee for the conference is 180 €. The fee covers meals (two lunches and the conference dinner) and coffee breaks. The registration fee will be waived for PhD students that will be selected to present their work.
