

1st GREEN-Econ Spring School in Environmental Economics

May 22-25, 2018
Marseille (France)

KEYNOTE LECTURES

Hassan Benchenkroun, McGill University
Fossil resources and renewables: recent developments

Luc Doyen, GREThA & CNRS
Ecological-economic modelling for biodiversity

The Aix-Marseille School of Economics and the CEE-M (Montpellier) organize the 1st Spring School in Environmental Economics in the context of the ANR-funded research project GREEN-Econ:

<https://sites.google.com/view/anr-green-econ/home>

◇ Submissions should be sent to the following address:

green-econ@amse-aixmarseille.fr

Submissions of a short CV and a copy of an article should be received no later than **March 15th, 2018**.

Final decisions will be made before **March 31st, 2018**.

The topics covered by the workshop are:

- Biodiversity and ecosystems
- Commons management
- Non-renewable resources
- Pollution
- Resources and experimental economics

This Spring School is divided into two parts: Two lectures and around 15 student presentations (advanced PhD students) will be organized during the first two days, while the last two days will be dedicated to a workshop on more advanced topics. This year, the school mainly focuses on resource economics with 2 lectures.

This call is dedicated to PhD students who are willing to attend this Spring School and to present one of their research works in relation to the topics covered by the workshop.

We cover, for the selected students, travel and accommodation expenses for the four days of the Spring School.
