

PARIS SCHOOL OF ECONOMICS
ÉCOLE D'ÉCONOMIE DE PARIS

The Paris School of Economics (PSE) is opening a position for a researcher specializing in environmental economics, with a focus on environmental policy. PSE will consider candidates with a track record of publications in the best international journals in this field and/or experience in applied environmental policy. Advantage will be given to candidates with proven experience in obtaining research grants from national and international institutions.

Both academic economists with the willingness to develop applied research, as well as economists from international institutions wishing to rely more heavily on academic research, are encouraged to apply.

If recruited, the candidate is expected to conduct rigorous research on the practical challenges of environmental policy, developing this topic within PSE, as well as developing partnerships with governments, international organizations and large companies around this topic.

Recruitment will be based on a permanent (CDI) academic position offered by one of PSE's partner institutions. The position may be junior or senior, according to the experience and the level of scientific publications. The PSE Foundation will supplement the basic remuneration with a contract indexed to impact in terms of evaluation of environmental policies and on the volume of external grants and contracts obtained by the researcher. **A competitive salary based on European standards will be offered.**

Candidates should send their application to Julia Piquemal (julia.piquemal@psemail.eu) **before October 15th, 2020**. The application should include a CV (with references) and a motivation letter. Expected date of employment: to be discussed with the candidate.
